

# Ali Razipour

Frontend-Focused Full Stack Engineer | React • Next.js • NestJS

 razipurali@gmail.com  Armenia (Relocating)  kai-zen  ali-razipour

## ABOUT ME

Frontend-focused Full Stack Engineer with **nearly 6 years of experience** building production software. My experience spans both self-built products and large-scale software systems—from building and operating a SaaS platform from the ground up to developing features and technical solutions for platforms serving **more than 5 million users**. Over the past two years, I have also led technical SEO initiatives that generate **over 1 million monthly organic clicks** through scalable Next.js implementations, Core Web Vitals optimization and technical SEO best practices.

I enjoy building products with **measurable impact** and thinking beyond implementation—from architecture to long-term maintenance.

This breadth of experience allows me to build scalable products while balancing performance, maintainability, and business needs.

## WORK EXPERIENCE

### Full Stack Engineer, Sofre

09/2023 – Present

- Built and launched a restaurant management SaaS platform using **React, Next.js, NestJS, MongoDB, and Electron**, serving **multiple active restaurants** through web and desktop applications.
- Designed and implemented core business workflows including order management, reporting, customer management, role-based access control, and operational automation tools.
- Architected reliable **offline-first synchronization** systems, allowing restaurants to continue operating during internet outages without data loss.
- Integrated with restaurant hardware and operational systems, including POS devices and QR-based ordering workflows.
- Digitized restaurant operations previously managed through paper records and manual processes, providing real-time access to historical data and business insights.
- Supports daily business operations **processing 100–150 orders per day**, with more than 40,000 orders and 12,000 unique customers recorded since launch.
- Owned the complete product lifecycle, including architecture, development, deployment, infrastructure, maintenance, and customer support.

### Front-end Engineer & SEO Analyzer, Faradars

10/2024 – Present

- Led technical SEO initiatives across **40,000+ pages**, improving search visibility and contributing to over 1 million monthly organic clicks.
- Developed and maintained user-facing features for one of the Middle East's largest educational platforms, serving more than **5,000,000 users**.
- Implemented performance, indexing, and rendering optimizations with a strong **focus on Next.js & Typescript best practices** and Core Web Vitals.
- Developed on complex business-critical features and frontend systems at scale, balancing performance, maintainability, and user experience.

- Collaborated with engineering, content, and product teams to deliver features and technical improvements across a high-traffic platform.

#### **Front-End Team Lead**, *Negargar Andishe*

01/2023 – 11/2024

- Led frontend architecture and technical decision-making for a B2B platform serving more than 8,000 active businesses using React, Next.js & Typescript.
- Established development standards, code review processes, and engineering best practices to improve maintainability and team productivity.
- Coordinated feature delivery, sprint planning, and technical execution while mentoring developers and ensuring project milestones were delivered on schedule.

#### **Front-End Developer**, *Zitro e-commerce*

03/2022 – 01/2023

- Developed customer-facing e-commerce applications using React and JavaScript, delivering production features in a fast-paced environment.
- Built custom administrative dashboards and business tools integrated with WordPress-based content and commerce systems.
- Collaborated with stakeholders to translate business requirements into scalable and maintainable frontend solutions.

#### **Front-End Developer**, *Cando Solutions*

12/2020 – 03/2022

- Developed and maintained React-based web applications and Progressive Web Apps (PWAs) using JavaScript.
- Delivered responsive, production-ready features while collaborating with cross-functional teams.

## **SKILLS**

**Frontend:** React • Next.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • Responsive Design • PWA

**Backend:** Node.js • NestJS • Express • REST APIs

**Database:** MongoDB • Mongoose • Redis

**Tools:** Docker • Git • Electron • Nextron

**DevOps & Desktop:** Docker • Git • Electron • Nextron

## **EDUCATION**

**B.S. in Computer Engineering**, *Azad University*
